# The Daffodil Farm

Walter R. Taylor  
Olympia, Wash., R4.

The following list of bulbs for the 1937 planting season will, we hope, be of some interest. As in the past, you will receive the best of quality, honestly graded as to size, and guaranteed to please you.

## GUARANTEE

We guarantee all stock true to name and to please on arrival. Further than this we cannot go, for we have no control over your climate or growing conditions. If for any reason you are not perfectly pleased with shipment, notify us at once and it will promptly be made right or your money refunded.

PRICES PREPAID, unless otherwise stated. Cash or 25 per cent with order and balance C. O. D. Stamps for small orders are welcome.

\* \* \*

## DAFFODILS

If some variety you wish is not listed let us know, we might be able to supply it. While very hardy, daffodil bulbs should be planted 6 to 8 inches deep, 4 to 6 inches apart in rows or beds. Soil should be in good condition and fertile, any fertilizers used should be turned under deeply. We urge you to plant in September if possible and not later than mid-October. May be left two or three years, dug when tops die down and divided.

Following prices PREPAID. DN. means double nose, bulbs showing two or more flower centers. SN. means single nose, or round bulbs with one flower center. 6 at dozen rate.

### ALL YELLOW TRUMPET DAFFODILS

	DN.	SN.		
	1	12	1	12

## Hybrid Delphiniums

There was a time when June was called the month of roses, but now it is the month of Delphiniums to all who know and grow this magnificent perennial. We do not suggest you forsake your roses, but plant the Delphiniums with them and if possible a few Madonna or Regal lilies as well.

Our strain of Delphiniums has been developed from seed from the best sources in America and England. The range of color, size and shape is wide. Colors are all shades of blue and lavender to purple; some flowerlets are 2½ inches across or more; spikes from three to seven and a half feet tall. Flowers are single, semi-double and double; dark and light blues.

We cannot too earnestly urge you to plant in the early fall for best results. Our plants have strong root growth and are easily shipped anywhere in the United States in the proper season. You will not be sent any plants the size of a fine needle to die on the way.

Two year plants, mixed, 25c each; 12 for \$2.50; special selections 35c and 50c each.

One year plants, mixed shades only, 15c each; 12 for \$1.00; \$6.00 per 100; medium size, 10c each; 75c for 12; \$4.00 per 100; small size, 30c per dozen; \$2.00 per 100, post paid. Seed, 10 cents per packet; three for 25 cents.
